

JOURNAL OF SOLUTION CHEMISTRY

Volume 14, 1985

Journal of Solution Chemistry is a forum for research on the physical chemistry of liquid solutions, covering such fields as physical chemistry, chemical physics, molecular biology, statistical mechanics, biochemistry, and biophysics. The greatest emphasis is on papers in which the solvent plays a dominant rather than incidental role. Most papers deal with experimental investigations of the dielectric, spectroscopic, thermodynamic, transport or relaxation properties of both electrolytes and nonelectrolytes in liquid solutions. Only those studies on pure liquids having bearing on their properties as solvents are considered. Theoretical papers that relate explicitly to measurable solution phenomena and papers describing new or novel apparatus or experimental methods are acceptable. A more detailed description of the editorial policy can be found in the Introductory Statement in the first issue.

Review articles, symposia, book reviews, and a calendar of meetings of interest to the solution chemist may appear from time to time. If the demand warrants it, a section on short communications will be instituted.

EDITOR

Robert L. Kay

Department of Chemistry
Carnegie-Mellon University
4400 Fifth Avenue
Pittsburgh, Pennsylvania 15213

EDITORIAL BOARD

Josef Barthel, Universität Regensburg, Regensburg, West Germany
Arthur K. Covington, The University of Newcastle upon Tyne, England
Jacques E. Desnoyers, Université de Sherbrooke, Québec, Canada
Werner Ebeling, Humboldt-Universität, Berlin, GDR
D. F. Evans, University of Minnesota, Minneapolis, Minnesota
Henry S. Frank, Pomona College, Claremont, California
Felix Franks, University of Cambridge, Cambridge, England
Harold Friedman, State University of New York, Stony Brook, New York
Raymond M. Fuoss, Yale University, New Haven, Connecticut
Loren G. Hepler, University of Alberta, Edmonton, Alberta, Canada
H. G. Hertz, University of Karlsruhe, Karlsruhe, Germany
Donald E. Irish, University of Waterloo, Waterloo, Ontario, Canada
George Janz, Rensselaer Polytechnic Institute, Troy, New York
Jean-Claude Justice, Université de Paris VI, Paris, France
S. Lindenbaum, University of Kansas, Lawrence, Kansas
Rufus Lumry, University of Minnesota, Minneapolis, Minnesota
R. H. Stokes, University of New England, Armidale, Australia
Robert H. Wood, University of Delaware, Newark, Delaware
